

RAVI KATTA

Software Developer | B.Tech CSE (2023–2027) | PP Savani University

+91 91210 64675 | kattaravi199@gmail.com | github.com/kattaravii | linkedin.com/in/kattaravii

ABOUT ME

I am a Software Developer with a focus on Frontend (Full Stack) who enjoys building clean, responsive web apps that work well and look good. I am good with React.js, HTML, CSS, Bootstrap, and Vite. I have built projects from scratch covering both frontend and backend. I also completed a 5-course Android Development course from Vanderbilt University on Coursera, and have certifications from NPTEL and AWS. I am looking for internships where I can contribute and keep learning.

EDUCATION

PP Savani University — B.Tech in Computer Science 2023 – 2027

Focus: Frontend Development · Full Stack · IoT Systems · AI Technologies

Narayana Junior College — Intermediate (Class XII) 2021 – 2023

Guntur, Andhra Pradesh | 83%

Sri Kakatiya High School — SSC (Class X) up to 2021

Pedakurapadu, Guntur, Andhra Pradesh | 97%

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, Bootstrap, Vite

UI Practices: Responsive Design, Component Architecture, Cross-browser Compatibility

Backend: Node.js, Express.js, REST APIs

Languages: Java, Python

Database: MongoDB, MongoDB Atlas

Mobile: Android (Java) — Activities, Intents, Services, Local IPC, Content Providers

AI / APIs: API Integration, AI-powered Tooling

Dev Tools: Git, GitHub, Postman, VS Code | Agile/Scrum

PROJECTS

DocuMind AI — Resume Processing Platform 2025–2026

React.js · Node.js · MongoDB · DeepSeek AI · REST APIs (MERN Stack)

- Built the full frontend myself — resume upload UI, analytics dashboard, and role-based access screens for students and admins
- Integrated local DeepSeek AI model to automatically extract student data from resumes, removing the need for any cloud API
- Reduced manual admin data entry by 80% and cut cloud API costs to zero by running the AI model locally

CodeMind.ai — AI-Powered Code Review Tool 2025–2026

React.js · Vite · Node.js · Express.js · API Integration · REST APIs

- Built the full frontend using React.js and Vite — a clean code editor UI where users paste code and get bug reports with fix suggestions
- Connected the frontend to a Node.js backend that calls an AI API and sends back results in plain language
- Made the UI fully responsive and broke it into reusable components like error cards, code panels, and suggestion views

Grocery Mart — E-Commerce Platform 2025–2026

React.js · Bootstrap · Node.js · Express.js · MongoDB Atlas

- Built the entire frontend myself — product listing page, cart, and checkout screens — all responsive using React.js and Bootstrap
- Created reusable components like ProductCard, CartItem, and CheckoutForm so the UI stays consistent across the app
- Connected to a Node.js/Express backend with MongoDB Atlas for products, cart, and order data via REST APIs

CERTIFICATIONS

Coursera — Android App Development Specialization 2025–2026

Vanderbilt University (5-course series)

- Java for Android
- Android App Components — Intents, Activities, and Broadcast Receivers
- Android App Components — Services, Local IPC, and Content Providers
- Engineering Maintainable Android Apps
- Capstone MOOC for Android App Development

NPTEL 2026

- Introduction to IoT
- Human Computer Interaction

AWS 2026

- Cloud Computing Foundations
